Amref Health Africa
Ethiopia
Since 2002
Aligning with the Government Health Sector Transformation Plan (HSTP), we work to ensure health equity by serving women and children, reaching the most disadvantaged, inaccessible communities including pastoralist and semi-pastoralist communities.

Integrating programming for youth as one of its focus areas, Amref supports young people to strengthen their voices and agency and become a positive force for development in their country.

Our programs are designed to support community level interventions while strengthening health systems at the regional and national levels.

With over half a century of experience in building health systems in Africa, we partner with those at the heart of communities, particularly women, children and youth to bring lasting health change in Africa.

Since 2002, Amref Health Africa in Ethiopia implements diverse health and development portfolios throughout the country.

Our Program Focus Areas
- Reproductive, Maternal, Neonatal, Child, Adolescent and Youth Health and Nutrition
- Water, Sanitation & Hygiene
- Human Resources for Health
- Integrated programming for young people
- Emergency Responses including COVID-19 Response

These programmatic themes strategically engage cross-cutting issues including gender and social inclusion, policy and advocacy, research, and innovations and technologies.

In addition, our organization engages in emergency programs, including nutrition and resilience building of affected communities to improve livelihoods of communities and reduce their vulnerability to shocks, such as droughts and other natural disasters without compromising long-term development.

Our Partnerships
We work closely with Government key ministries and regional offices – Ministry of Health, Ministry of Women & Social Affairs, Ministry of Water & Energy, Ministry of Education, Ministry of Labor and Skills, as well as multiple local and international health and development implementing organizations.
Our Geographic Footprint-2022
We implement projects in all 11 regional states and two city administrations.
