

2024 at a Glance

Amref Health Africa Ethiopia

We are Amref Heath Africa Ethiopia

As we reflect on the past year, we are excited about the progress we've made toward improving health systems and the lives of communities in places where we operate. Our commitment to community-centered interventions and strengthening health systems at all levels has driven meaningful change. Our commitment to innovation, community impact, and sustainability continues to drive our mission forward.

Yet, there is still much work to be done to ensure that health systems function optimally, and that communities are empowered to hold these systems accountable for high-quality and affordable care.

As we look to the future, we invite you to be a part of our journey toward lasting health change in our communities. Your support is crucial to continue driving the mission of community-led health systems, tackling social determinants of health, and making a tangible impact on the ground. Together, we can build a healthier Ethiopia, one where every community has access to the care they need. Join us on this journey, supporting these critical programs and making a real difference in the lives of those who need it most. Your contribution, whether through funding, partnerships, or advocacy, plays a vital role in helping us achieve our goals and expand our impact.

VISION

We are committed to bringing lasting health change in Ethiopia

MISSION

Catalyse and drive community-led and people-centred primary health care services while advocating for addressing social determinants of health

STRATEGIC PILLAR 1

Invest in people-centred health systems for sustainable primary health care service delivery

STRATEGIC PILLAR 2

Target social determinants and emerging threats at the intersection with health to increase equitable access

OBJECTIVE 1: Increased access to and utilisation of Primary Health Care (PHC) services.

OBJECTIVE 2: Empowered vulnerable groups especially women & young people

OBJECTIVE 3: OBJECTIVE 3: Strengthened resilient health systems

ORGANISATIONAL ENABLERS

Operational Excellence

People and Culture Excellence

Technical Excellence

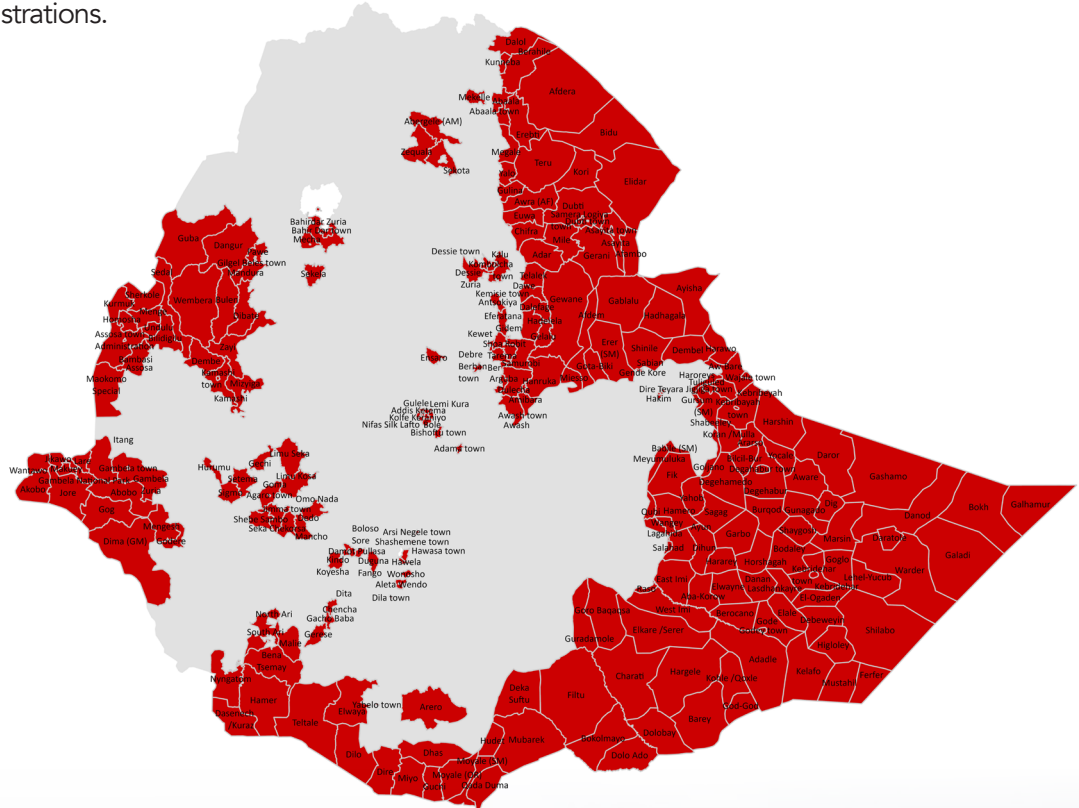

Partnerships Excellence

Resource Mobilisation Excellence

Our Geographic Footprints

We implement projects in 12 regional states and two city administrations.

Key Achievements 2024

5.4 MILLION
People reached

288
Districts covered

694
Health centers &
hospitals supported

15,000
Health workers
trained

59,000
Youths and women
trained on business &
entrepreneurship skills

7,700
Youth and women with
job & employment
opportunities created

Strategic Objective 1

Increased Access to and Utilization of Primary Health Care Services

We work to improve equitable access to quality primary health care (PHC) as a pathway toward achieving Universal Health Coverage (UHC). To achieve this, we prioritize high-impact PHC programs that drive positive health impact, particularly on women and young people. Key focus areas include reproductive, maternal, newborn, child, adolescent, and youth health and nutrition; water, sanitation and hygiene; disease prevention and control, and mental health. These efforts aim to improve overall health outcomes for our communities. We also prioritize designing integrated service delivery models and initiatives that emphasize quality improvement, leverage technology for more efficient PHC systems, and promote digital inclusion to ensure equitable access for all.

Reproductive, Maternal, Neonatal, Child, Adolescent & Youth Health and Nutrition

891,000

Women received family planning services

150,000

Women received antenatal care four or more times

132,000

Birth attended by skilled health workers

140,000

Children fully immunized

Disease Prevention and Control

77,556

People received antibiotics through mass drug administration

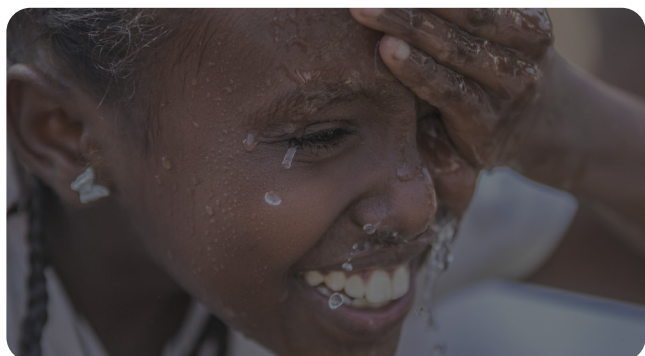

14,000

People screened and treated for trachoma

3,782

People received Trachomatous Trichiasis (TT) Surgery

WASH

68,000

People accessed improved sanitation facilities

52,000

People accessed safe water supply

Strategic Objective 2

Empowered Vulnerable Groups, Especially Women and Young People

We work towards advocating for the social determinants of health and addressing the health-related challenges that intersect with broader social issues. Our aim is to empower women and young people through five key interventions: enhancing livelihoods, mitigating the impact of climate change on health, promoting gender and social inclusion, encouraging positive behavior change, and building the capacity of civil society organizations (CSOs) to support social accountability.

770,000

Youth and other community groups reached through health literacy

59,000

Youths and women trained on business and entrepreneurship skills

7,700

Youth and women with job and employment opportunities created

Strategic Objective 3

Strengthened Resilient Health Systems

To effectively address primary health care (PHC) needs and manage emerging health threats, it is essential to strengthen integrated health systems that support both health and preparedness. Our approach to building more resilient community health systems focuses primarily on three key areas: human resources for health (HRH), health care financing, and leadership, management, and governance (LMG). Additionally, we emphasize the implementation of robust health information systems to support data-driven decision-making and improve system efficiency.

15,000

Health workers trained: health extension workers, nurses, midwives, doctors...trained

360

Healthcare leaders trained on managerial accountability and Community Score Card

35

Health facilities and youth friendly services Constructed and renovated

78

Wash facilities rehabilitated and constructed

Our Partnership

We have established a strong network of strategic partnerships, working closely with key government ministries such as the Ministry of Health, Ministry of Water and Energy, Ministry of Women and Social Affairs, Ministry of Education, and Ministry of Labor and Skills. These collaborations enable Amref to effectively align its efforts with national priorities and policies, ensuring that its interventions address the most pressing health needs. Additionally, Amref partners with regional health bureaus to strengthen the capacity of local governments to implement sustainable healthcare solutions for communities. Beyond government collaborations, Amref also works with a diverse array of local and international health and development organizations, donors, and the private sector. By engaging with these partners, Amref is able to leverage their expertise, resources, and networks to expand the impact of its programs, ultimately driving lasting health change in communities.

30

Local CSOs capacitated for social accountability
